Effect of school closure on COVID-19 cases

Closure of schools was associated with 1.37 million fewer cases and 40,600 fewer deaths from COVID-19 in a six-week study period. However, international studies examining the impact of reopening schools from kindergarten to grade 12 found no consistent relationship between the reopening of these schools and the spread of COVID-19. Other studies that looked at multiple policy changes have shown more modest changes associated with school closure.

The Scale of Impact Till Now

- The unprecedented scale of the impact of COVID-19 on Indian real estate can be gauged from the fact that the sector has incurred a loss of over Rs 1 lakh crore since the pandemic broke out
- If a report by India Ratings (Ind-Ra) is referred to, the overall residential demand declined by over 40 percent in H1 of FY21.
- According to a report by Liases Foras, the COVID-19-led lockdown resulted in a surge in unsold inventory from over 15 quarters at the end of FY-20 to over 19 quarters towards the e

Impact of Covid-19 on Tourism and Aviation Industry

- Around 58% of tourists arrive at their destination by air and the stop in air traffic has created a massive negative effect on that industry as well.
- Nearly 39,200 special repatriation flights took nearly 5.4 million citizens home after borders closed in March 2020
- Export revenues from tourism could fall by \$910 billion to \$1.2 trillion in 2020. This will have a wider impact and could reduce global GDP by 1.5% to 2.8%.
