

COMPUTER LAB

At D.A.V we have one of the best facilities for imparting computer education to students from class I to XII. It has at present 8 computer laboratories having more than 250 computers, the majority being P- IV to impart computer education to students of classes I to V, a new multimedia Lab has been developed to keep the children abreast of the latest happenings in the computer world. We have the latest P- IV dual core computers with 80Gb hard disk and 3GHz speed . All these computers are networked for resource sharing. Major emphasis is on beautiful graphics and sound effects blending education and fun.

The computer center has a video projection system. This VPS is a great boon for computer aided learning. We also have the internet facility and students successfully browse on Internet Explorer and Netscape Navigator.

The students can surf through the latest websites and hence make use of the vast resource of knowledge being provided on the internet. To top it all, a software for TIMETABLE management has also been introduced. This facilitates the formation of the time table for the various classes of the schools.

Extraneous allocation shortfalls, double allocation status and weekly work load can be easily checked with this software, Moreover, the school has an automatic fees computing system which helps in students fee details retrieval, computing transport fees, late fees, practical fees, concessions among other information.
